The book is written by a team of international experts and is divided into four sections: medical conditions, surgical conditions, psychiatric conditions, and social and ethical issues. Each section contains a series of case studies that illustrate the principles of diagnosis and management of common geriatric conditions. The book also includes a chapter on the global burden of disease in the elderly and a discussion of the challenges and opportunities facing geriatricians around the world.

Case Studies

The case studies in *Case-Based Geriatrics: A Global Approach to Patient Care* are drawn from a variety of clinical settings, including hospitals, nursing homes, and community clinics. The cases are written in a clear and concise style, and they provide a wealth of information about the diagnosis and management of geriatric conditions.

The cases are also accompanied by discussion questions that help readers to reflect on the key points of the case and to apply the principles of geriatric care to their own practice.

Global Approach

Case-Based Geriatrics: A Global Approach to Patient Care is unique in its global perspective. The book includes case studies from a variety of countries around the world, and it discusses the challenges and opportunities facing geriatricians in different settings.

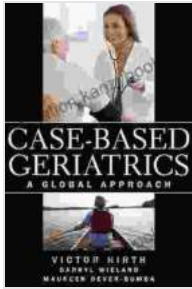

The book also includes a chapter on the global burden of disease in the elderly, which provides a comprehensive overview of the health challenges facing elderly people around the world.

Case-Based Geriatrics: A Global Approach to Patient Care is a valuable resource for geriatricians, geriatric nurses, and other healthcare professionals who care for elderly patients. The book provides a comprehensive and evidence-based approach to the care of geriatric conditions, and it offers a unique global perspective on the challenges and opportunities facing geriatricians around the world.
