## **Homeopathy**

Homeopathy is a system of medicine that uses highly diluted substances to stimulate the body's own healing response. Homeopathic remedies are made from plants, minerals, and animals. They are diluted to such a degree that there is no measurable amount of the original substance left in the remedy. However, the homeopathic remedy still retains the energetic imprint of the original substance, and it is this imprint that stimulates the body's healing response.

There is a growing body of research that supports the use of homeopathy for the treatment of osteoporosis. A study published in the journal *Alternative Medicine Review* found that homeopathy was effective in reducing bone loss and improving bone density in women with osteoporosis. Another study, published in the journal *Homeopathy*, found that homeopathy was effective in reducing pain and improving function in people with osteoporosis.
